Skills

Interests

Software craftsmanship

Open-source

Data Visualization

Predictive Modelling

Big Data & Distributed Computing

Languages

Experience

Aug 2017 -
Today

Data Analytics for Distribution (DAD) project

Enedis

Technical Lead, Craftman & Data-Scientist. Apache spark lover.

- Machine learning (spark on hadoop & HPC) for predictive maintenance (on french electricity distribution assets).
- Distributed graph computing on spark & Neo4j, geospatial data analysis.
- Open source tools usage : MLFlow, Airflow, Superset

Aug 2015 -
Aug 2017

DataLabs

Enedis

Developer, & Data-Scientist.

- Integration of Ethereum Blockchain inside Enedis Website, with craftmanships best-practice.
- Human Resources data project, studying carrers and evolution of Enedis' employees. Data Visualitation with Tableau software.
- Designing of Enedis new Big-Data architecture : Kafka, spark on hadoop, Cassandra.

Feb 2013 -
Aug 2015

STM project, (Massive Treatment System)

Enedis

Technical Lead on Enedis Big-Data project.

- Architecture design with respect to company standards (supervision, security and performance).
- Analytical research on Hadoop / hive and Teradata database.
- Implementation of performance SLA et performance workflow on the project. Benchmark with Apache JMeter.

Feb 2010 -
Jan 2013

SIMM Project (Mass Market Information System)

EDF

Performance and Oracle expertise on EDF critical business software (CRM, billing & BI) with huge amount of data (40TB).

- Database optimisation and SQL tuning with big data volumes.
- Database evolutions design and implementation : Oracle 11g, data compression, partitioning, RAC Clustering.
- Management of Oracle experts team. Oracle contracts (support and consulting) follow-up.

Education

2018 - 2019 **MSc part-time student**

Data Science Tech Institute

Paris, France

Applied MSc in Data Science & Artificial Intelligence

2007 - 2010 **Engineering student**

INSA de Rouen

Rouen, France

Information Systems Architecture

Technical Papers

- "Using Big Data analytics to improve flood resilience of the distribution grid" - CIRED 2019
- "Optimizing network replacement with AI" - CIRED 2019
