

Jérémie MÉRIGEALT

Big-Data & Machine
Learning Engineer,
Techlead Data Scientist

+33 6 18 77 49 91

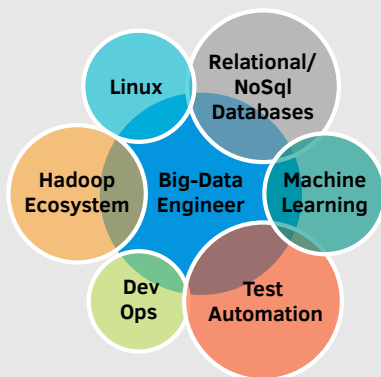

<http://github.com/~JeremM>

jeremie.merigeault@gmail.com

Skills

Interests

Software craftsmanship

Open-source

Data Visualization

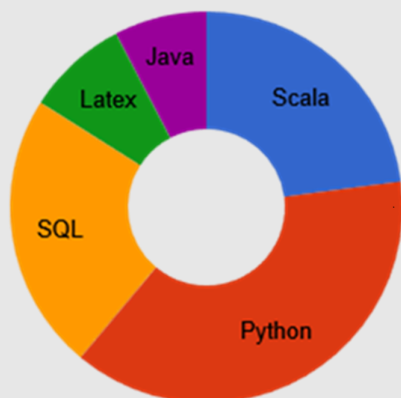

Predictive Modelling

Big Data & Distributed Computing

Languages

Experience

Apr 2021 -
Today

Digital Factory

Technical Lead Data-Scientist.

Enedis

- Business Owner of Enedis Data Science on prem & cloud platform.
- Trainer for multiple data training session : data-science, big-data infrastructure, dev-ops & tools (MLFlow, Airflow).
- Development of shared API : data access, statistical tools.

Aug 2017 -
Apr 2021

Data Analytics for Distribution (DAD) project

Technical Lead, Craftman & Data-Scientist. Apache spark lover.

Enedis

- Machine learning (spark on hadoop & HPC) for predictive maintenance (on french electricity distribution assets).
- Distributed graph computing on spark, geospatial data analysis.

Feb 2013 -
Aug 2017

STM project, (Massive Treatment System) & Datalabs

Developer & Data-Scientist on Enedis Big-Data project.

Enedis

- Multiple Data Science projects : Human Resources, Metering, Network maintenance.
- Implementation of performance SLA et performance workflow. Benchmarks with Apache JMeter.
- Architecture design of Enedis new Big-Data architecture : Kafka, spark on hadoop.

Feb 2010 -
Jan 2013

SIMM Project (Mass Market Information System)

Performance and Oracle expertise on EDF critical business software (CRM, billing & BI) with huge amount of data (40TB).

EDF

- Database evolutions design and implementation : Oracle 11g, data compression, partitioning, RAC Clustering. Database optimisation and SQL tuning with big data volumes.
- Management of Oracle experts team. Oracle contracts (support and consulting) follow-up.

Education

2018 - 2019 **MSc part-time student**

Data Science Tech Institute, Paris, France

Applied MSc in Data Science & Artificial Intelligence

2007 - 2010 **Engineering student**

INSA de Rouen, France

Information Systems Architecture

Conference Papers

- "Predictive maintenance on overhead medium voltage network using transient faults data" - CIRED 2023
- "Big data applications for improving the reliability of the french electricity distribution grid" - Handbook of Smart Energy Systems, 2022 - Springer
- "Analysing overhead medium voltage network criticity with ai" - CIRED 2021
- "Optimizing Replacement of Power Distribution Network Cables with Graph Computing and Machine Learning" - ESREL 2020
- "Using Big Data analytics to improve flood resilience of the distribution grid" & "Optimizing network replacement with AI" - CIRED 2019
